Answer:

8. 0.5 points

The Eiffel Tower is a landmark in Paris. It was built between 1887 and 1889. The Tower was the

Time remaining: 00:19

Exposition's main attraction. There are also 1,710 steps inside the Eiffel Tower, although visitors can only climb the first 703 steps to the first floor. In total, the tower weighs 10,000 tonnes. It consists of 18,038 pieces and 2.5 million rivets put on by heat. The weight of paint used is 45,000 liters, and the surface to be painted is 250,000 square meters. Since it has been built it has been repainted 18 times. Each of these 18 paint jobs there were only 25 painters are hired to do the job. Three separate colors of paint are used on the structure in order to enhance the impression of height, with the lightest at the top. The Eiffel Tower was built by Alexandre Gustave Eiffel for the 100th anniversary of the French Revolution. Even though Gustave Eiffel is credited for the Eiffel Tower it was actually two lesser known people who came up with the original drawing of it. These people were Maurice Koechlin and Emile Nouguier. These two men were the chief engineers of Eiffel's engineering firm. The main architect was Stephen Sauvestre.

The Eiffel Tower was built by alexander Gustave Eiffel

- True
- False

9. با استفاده از کلمات داده شده جمله بسازید 1 point

Iran / river / Karoon / in / is / longest / the

Answer: Karoon is the longest river in Iran
